Approved by: DC Jim Hamilton

Narrative:

On 8/24/17 at 18:52:10 Grants Pass Fire Rescue responded to a Structure Fire at 530 NW Midland Ave. The fire crews arrived within four and a half minutes from time of dispatch.

The crews were told that someone may be inside the home. The first arriving engine reported smoke coming from the attic and fire in the kitchen area. Due to the possible life safety issues the crews made a quick entry into the back of the home and conducted a search of the home at the same time they were knocking down the kitchen fire. The fire crews found a dog lying on the floor and quickly removed it to the outside. There was nobody else in the home during the fire.

The dog was transferred to Grants Pass PD and with the help of Rural Metro and American Medical Response they were able to use a Canine Oxygen Mask to revive the dog. The dog was transported by Rural Metro's Operations Chief to Southern Oregon Veterinary Specialty Center in Central Point.

The cause of the fire was an unattended cooking error. There were no injuries to civilians or firefighters during this alarm. We ask that you have working
